

### ABOUT WORLD COPPER

World Copper is a mineral resource company focused on copper asset development in Chile. Historically, World’s team has been involved in the Chilean lithium space through Wealth Minerals (TSXV:WML | OTCQX:WMLLF). There are many overlaps between the copper and lithium industries regarding the green revolution. The World team has a unique skill in navigating the mining sector in Chile. Wealth management has substantial market experience and broad-based investor support, as well as deep contacts and know-how in Chile thanks to the accumulated mining operations history of its board members and management. John Drobe, P.Geo., a Qualified Person as defined by National Instrument 43-101, has reviewed and approved the technical information contained in this disclosure.

### PROJECT OVERVIEW: CRISTAL

-  Cristal is in a prospective porphyry copper belt, with high potential for additional large porphyry discoveries.
-  The 9km<sup>2</sup> of concessions are located close to the port city of Arica in northern Chile, adjacent to the Peruvian border, on public land with excellent infrastructure.
-  The Project is currently surrounded by large land positions held by several senior copper producers.
-  Prior exploration work was carried out in the area during the 1990s by various companies targeting a large buried porphyry copper deposit.
-  World Copper plans to follow up on this initial exploration work, focusing on a large geophysical anomaly and proposes an initial drill program of 4-6 holes, each 500-1000m deep. Total budget for this program is estimated to be about USD \$2 million.

A coincident northwest trending gravity high could represent a buried ridge within a potential porphyry copper system. A ridge would mean shallower cover and therefore shorter drill holes.

### Porphyry Copper Belt Quick Facts:

- USGS has categorized the belt that hosts Cristal at the **second highest level in South America** for undiscovered copper potential, extending from Chile into Peru.
- Cristal is located just southeast of the **most highly productive** copper mines in Peru, located within the same belt.
- Extensive cover of young, post-mineral volcanic rocks in the area have hampered exploration, leading to a gap in the belt’s chain of deposits: similar to central Chile prior to discovery of buried **Spence and Escondida deposits**.

# PROJECT OVERVIEW: ESCALONES

- Located 97km southeast of Santiago and near Chile's West Fissure, where a majority of the country's Cu-Mo porphyries occur (35km east of El Teniente, the world's largest underground copper mine).
- Infrastructure in place includes road access, power, proximity to major sea ports and a gas pipeline crossing the property.
- Established exploration camp facilities at 2400m elevation; majority of drilling has occurred at 3200m to 4000m elevation.
- Main porphyry has 24,939m drilled in 53 core holes, most recently in 2012-2013 (9070m drilled).

## Escalones Property Map

## Skarn & Lithocap Quick Facts:

- 2km x 1.6km porphyry copper system with associated **high grade skarn**, plus moly and silver credits.
- Mineralization is centered under a high ridge: ideal for low strip ratio.
- Higher-grade mineralization is at or near surface: **ideal distribution for open-pit mining**.
- Half of the lithocap remains **untested by drilling**: the "Mancha Amarilla".

## KEY TEAM MEMBERS

### Henk van Alphen | CEO and Director

- More than 30 years of experience in the mining industry. He has been a key player in companies such as Corriente Resources, Trevali Mining, and International Tower Hill.

### Marcelo Awad | Executive Director

- Mr. Awad has spent 18 years with Codelco, ending as Executive Vice President, as well as 16 years with Antofagasta Minerals, the Mining Division of Antofagasta Plc, 8 years of which he served as CEO.

### Roberto Frérait | Director

- Mr. Frérait has been prominent in the Chilean mining industry for over 3 decades, and has taken early retirement from his post as Exploration Manager for CODELCO Chile. He is one of the most knowledgeable and experienced mining professionals in Chile.

### Patrick Burns | President & Director

- Mr. Burns has been an active part of the flourishing Chilean copper industry and was instrumental in the discovery and exploration of the Escondida copper mine, which is currently the largest copper mine in the world.

## SHARE STRUCTURE

- 8.3M shares (CAD \$830,000 raised at \$0.10)
  - 25M shares (TMI – held for 3 years upon commencing trading)
  - 25M shares (WML – held for 3 years upon commencing trading)
  - 3.9M shares (Allante Resources Ltd.)
  - No warrants or options
  - Shares Outstanding: 62,200,000
  - Float: 12,200,200
- Current raise up to CAD \$1,500,000 at \$0.10 per share (no warrants)
